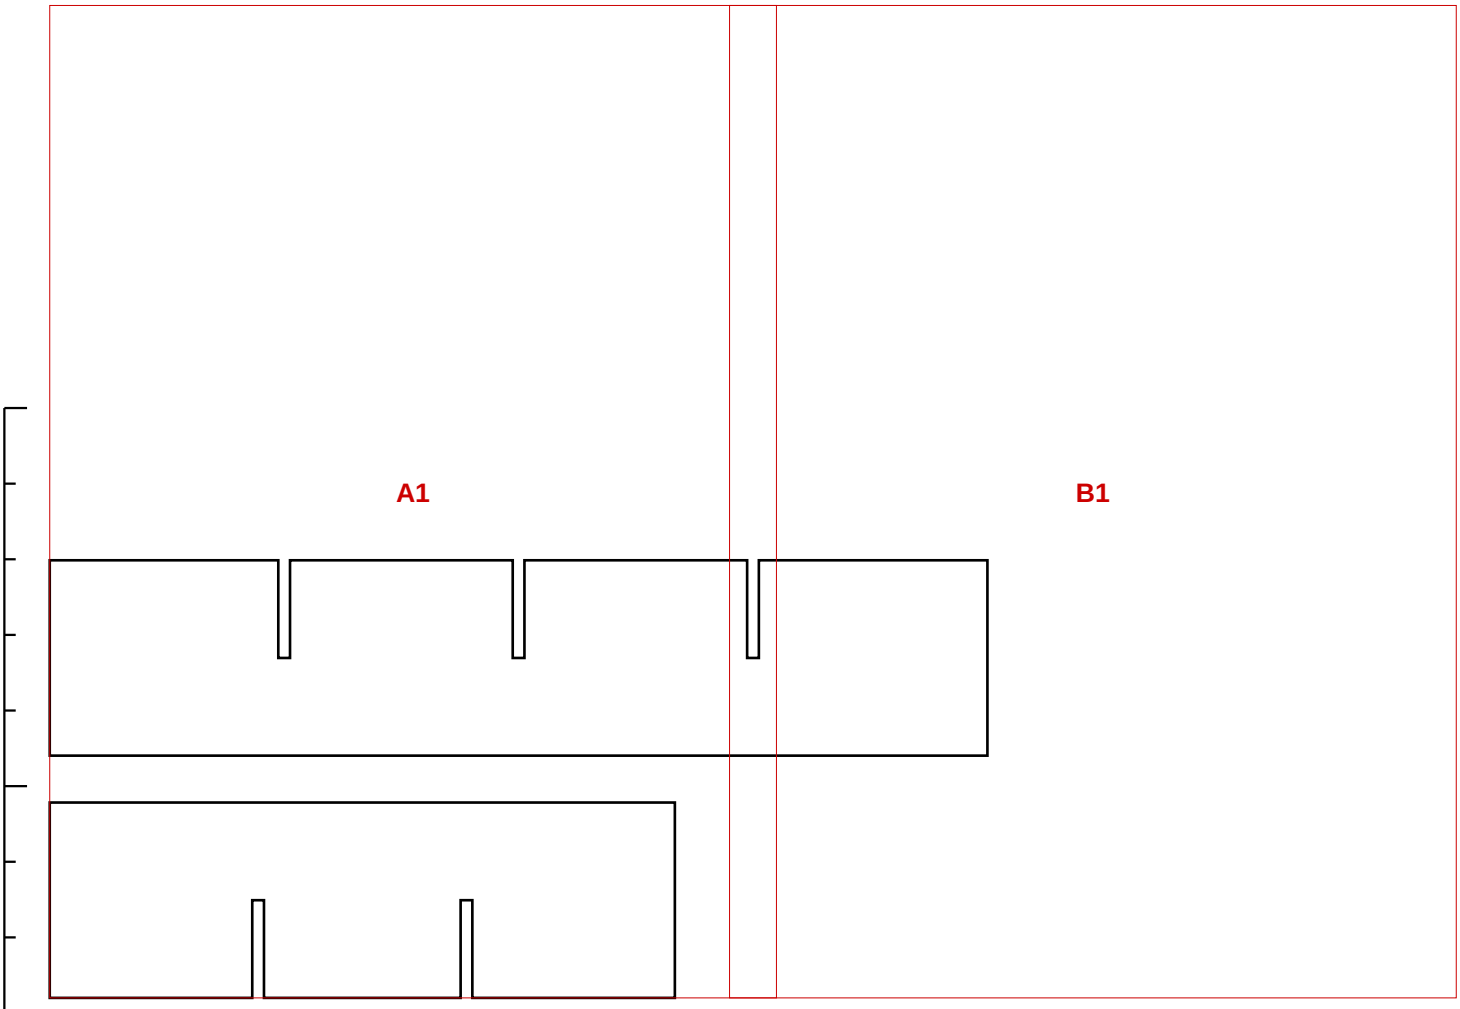
# 05 Drawer divider grid (240 x 160 x 50)

2 A4 sheets (2 across x 1 down) + this map. Print ALL pages at 100 % / actual size.

Solid = CUT  dashed blue = SCORE + FOLD  gray = GLUE  + = punch hole  Board 3 mm (slots 3 mm)



How to join the sheets:

1. Cut each sheet along its gray frame on the LEFT and BOTTOM side only (not on A-column / bottom row).
2. Lay it over its neighbour so the red crosses sit exactly on top of each other. Tape it.
3. Join a whole row first, then the rows. Then glue the template to the board and cut.

Parts: long strip x2 (x2), short strip x3 (x3)

Cut 2 long and 3 short strips (flutes running up-down for stiffness).

Slot the short strips down onto the long strips: 12 compartments.

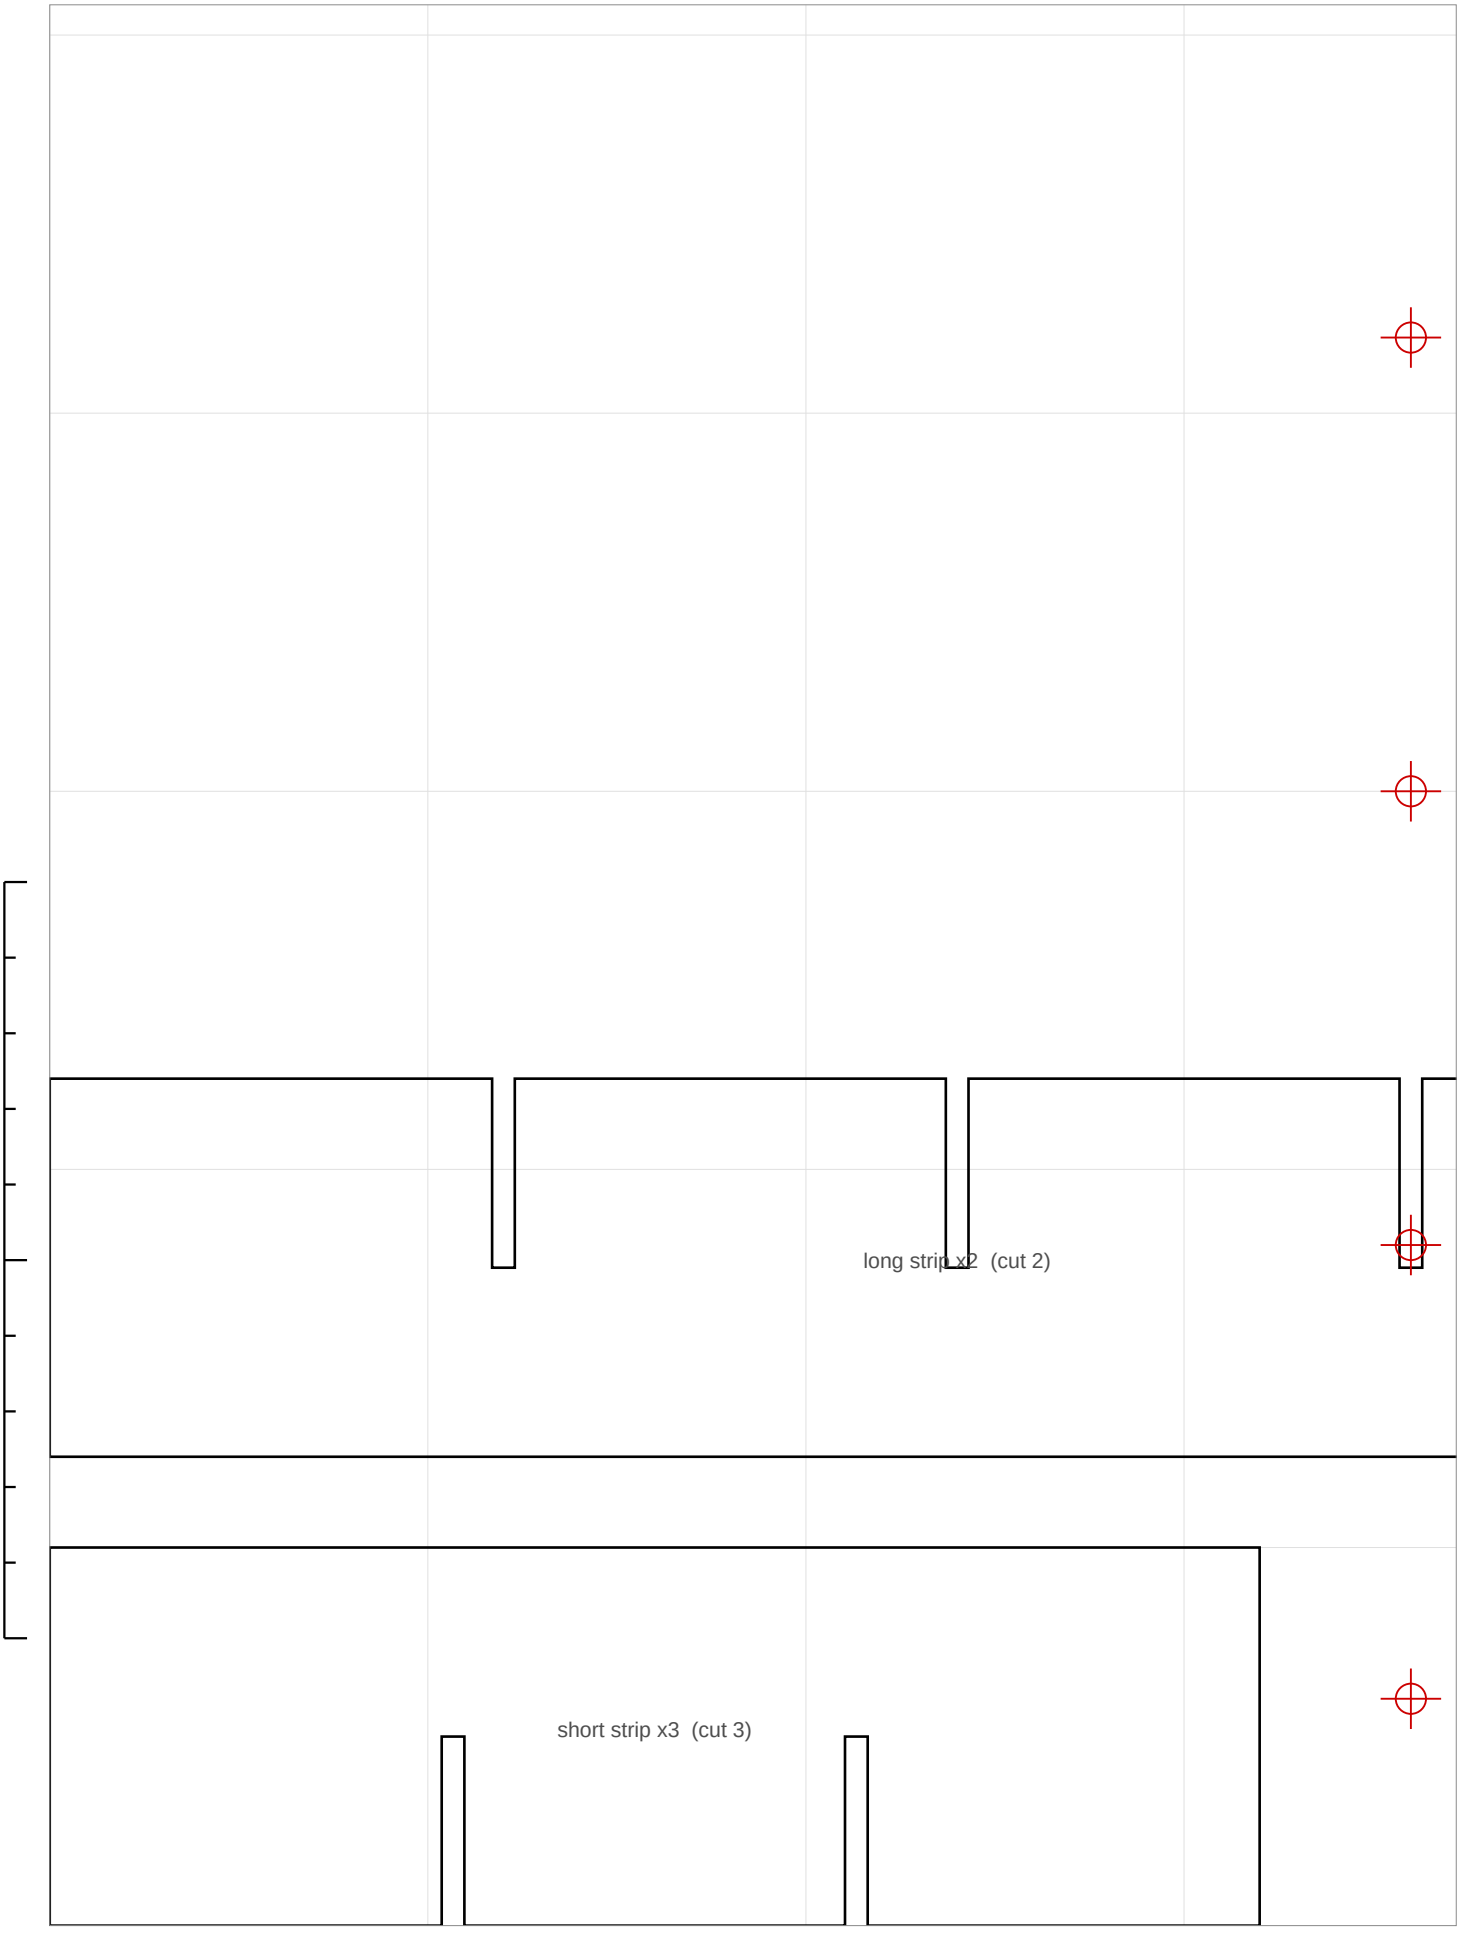
Change L, S, H in generate.py to fit your drawer.

100 mm: measure it! (print at 100 %)

# 05 Drawer divider grid (240 x 160 x 50)  -  sheet A1  (2 x 1)

Print at 100 %. Trim the LEFT and BOTTOM edge along the gray frame, then overlap the neighbour and match the red crosses.

Solid = CUT  dashed blue = SCORE + FOLD  gray = GLUE  + = punch hole  Board 3 mm (slots 3 mm)

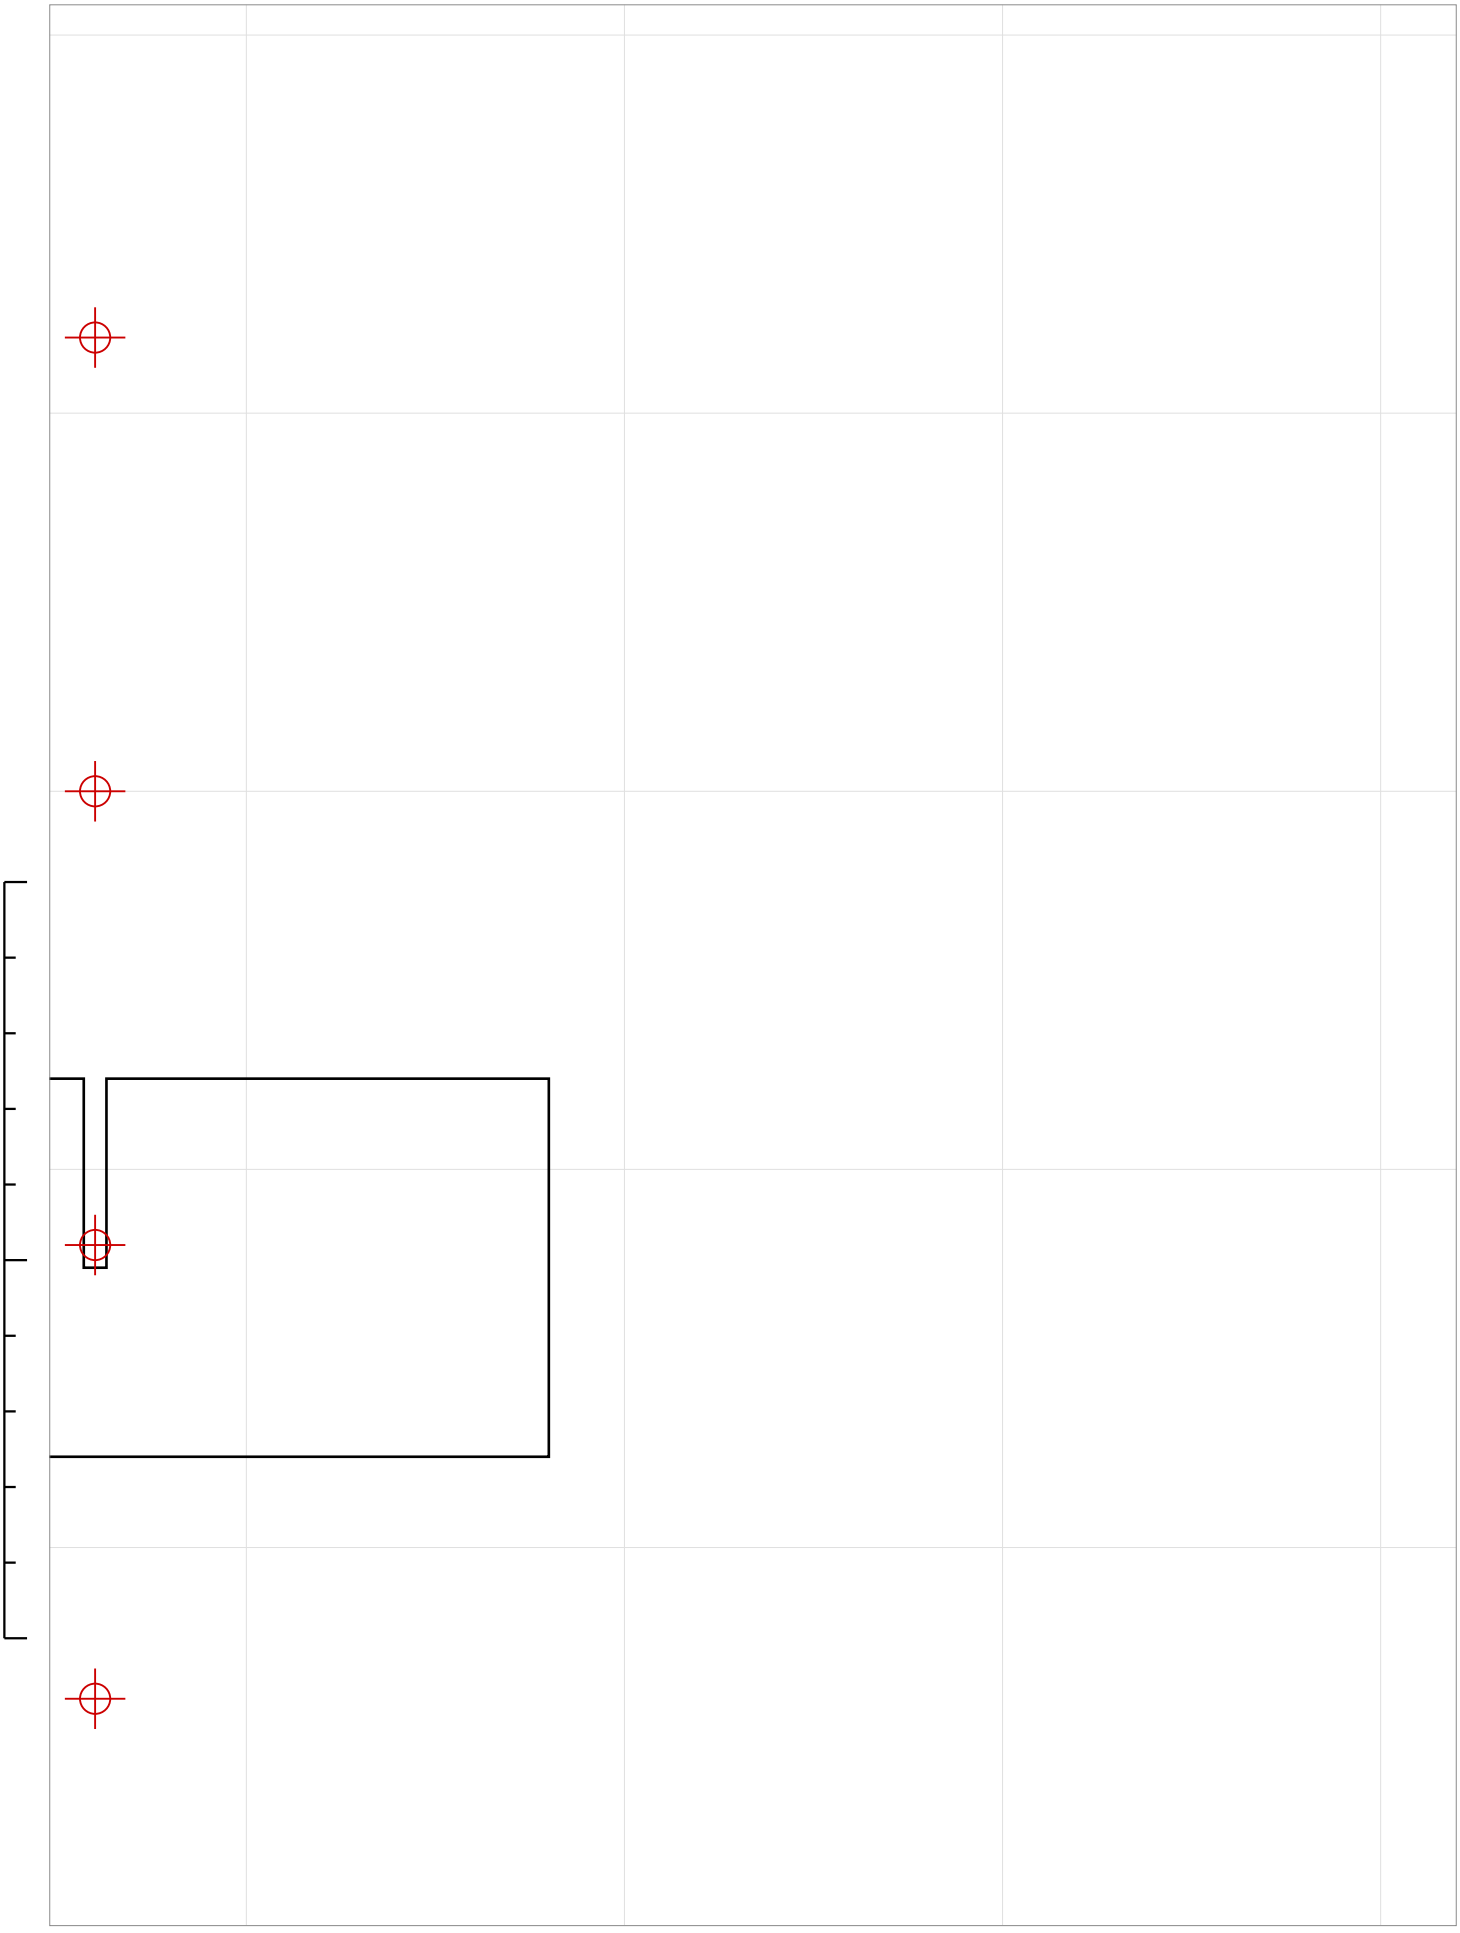


100 mm: measure it! (print at 100 %)

# 05 Drawer divider grid (240 x 160 x 50)  -  sheet B1  (2 x 1)

Print at 100 %. Trim the LEFT and BOTTOM edge along the gray frame, then overlap the neighbour and match the red crosses.

Solid = CUT  dashed blue = SCORE + FOLD  gray = GLUE  + = punch hole  Board 3 mm (slots 3 mm)



<- left edge overlaps sheet A1

100 mm: measure it! (print at 100 %)
