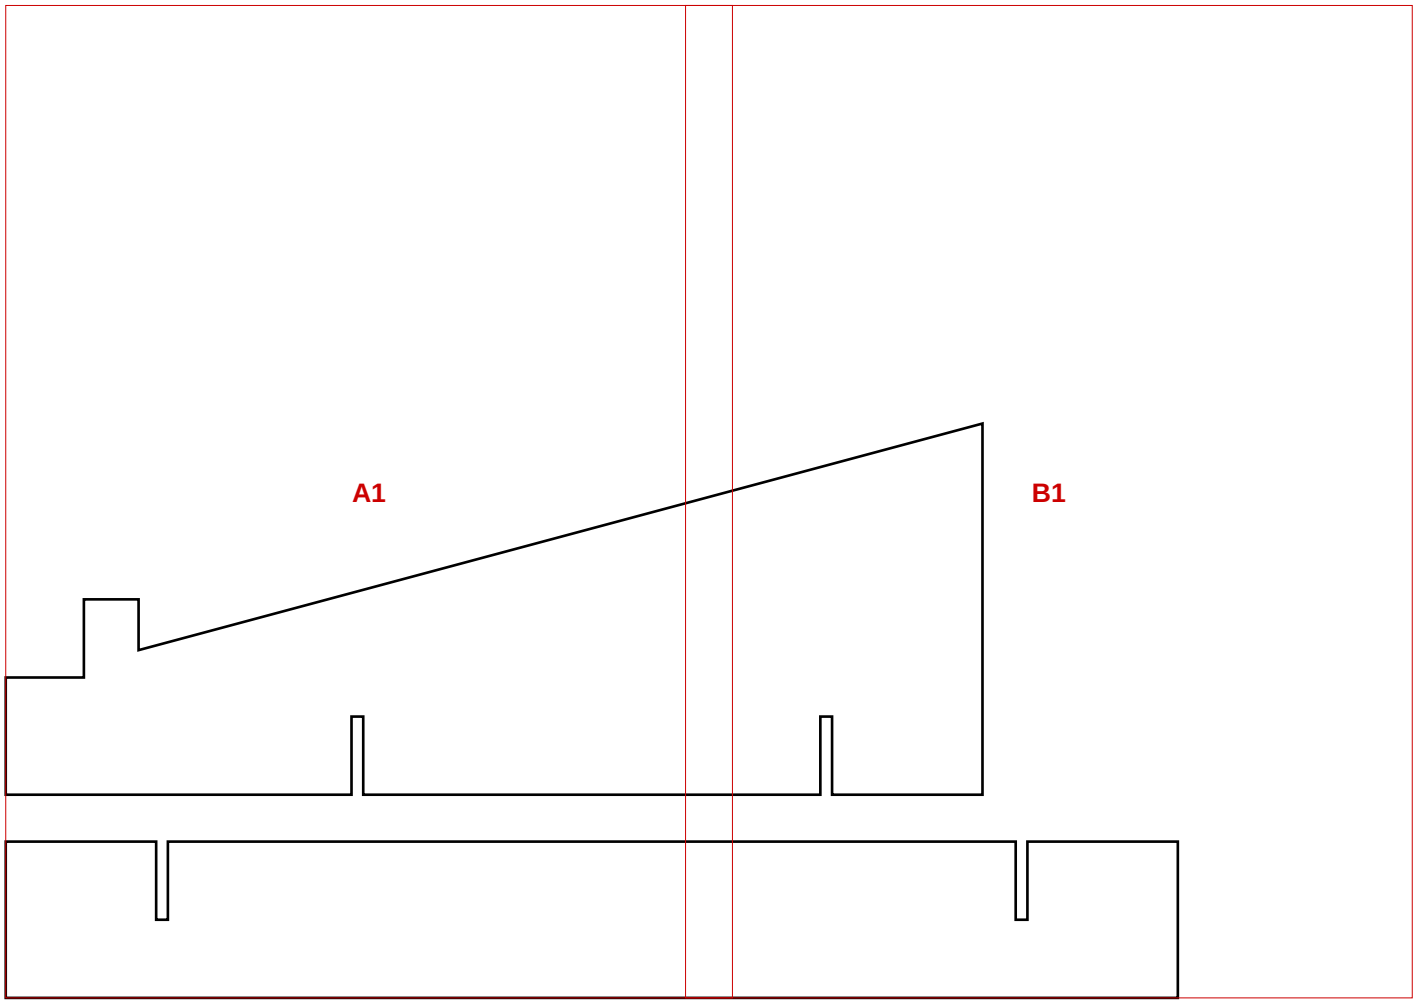
04 Laptop stand

2 A4 sheets (2 across x 1 down) + this map. Print ALL pages at 100 % / actual size.

Solid = CUT dashed blue = SCORE + FOLD gray = GLUE + = punch hole Board 3 mm (slots 3 mm)



How to join the sheets:

1. Cut each sheet along its gray frame on the LEFT and BOTTOM side only (not on A-column / bottom row).
2. Lay it over its neighbour so the red crosses sit exactly on top of each other. Tape it.
3. Join a whole row first, then the rows. Then glue the template to the board and cut.

Parts: laptop stand side x2 (x2), crossbar x2 (x2)

Cut 2 panels and 2 crossbars. Use double-wall board if you have it.

Slide the crossbars into the panel slots (crossbar slots point up).

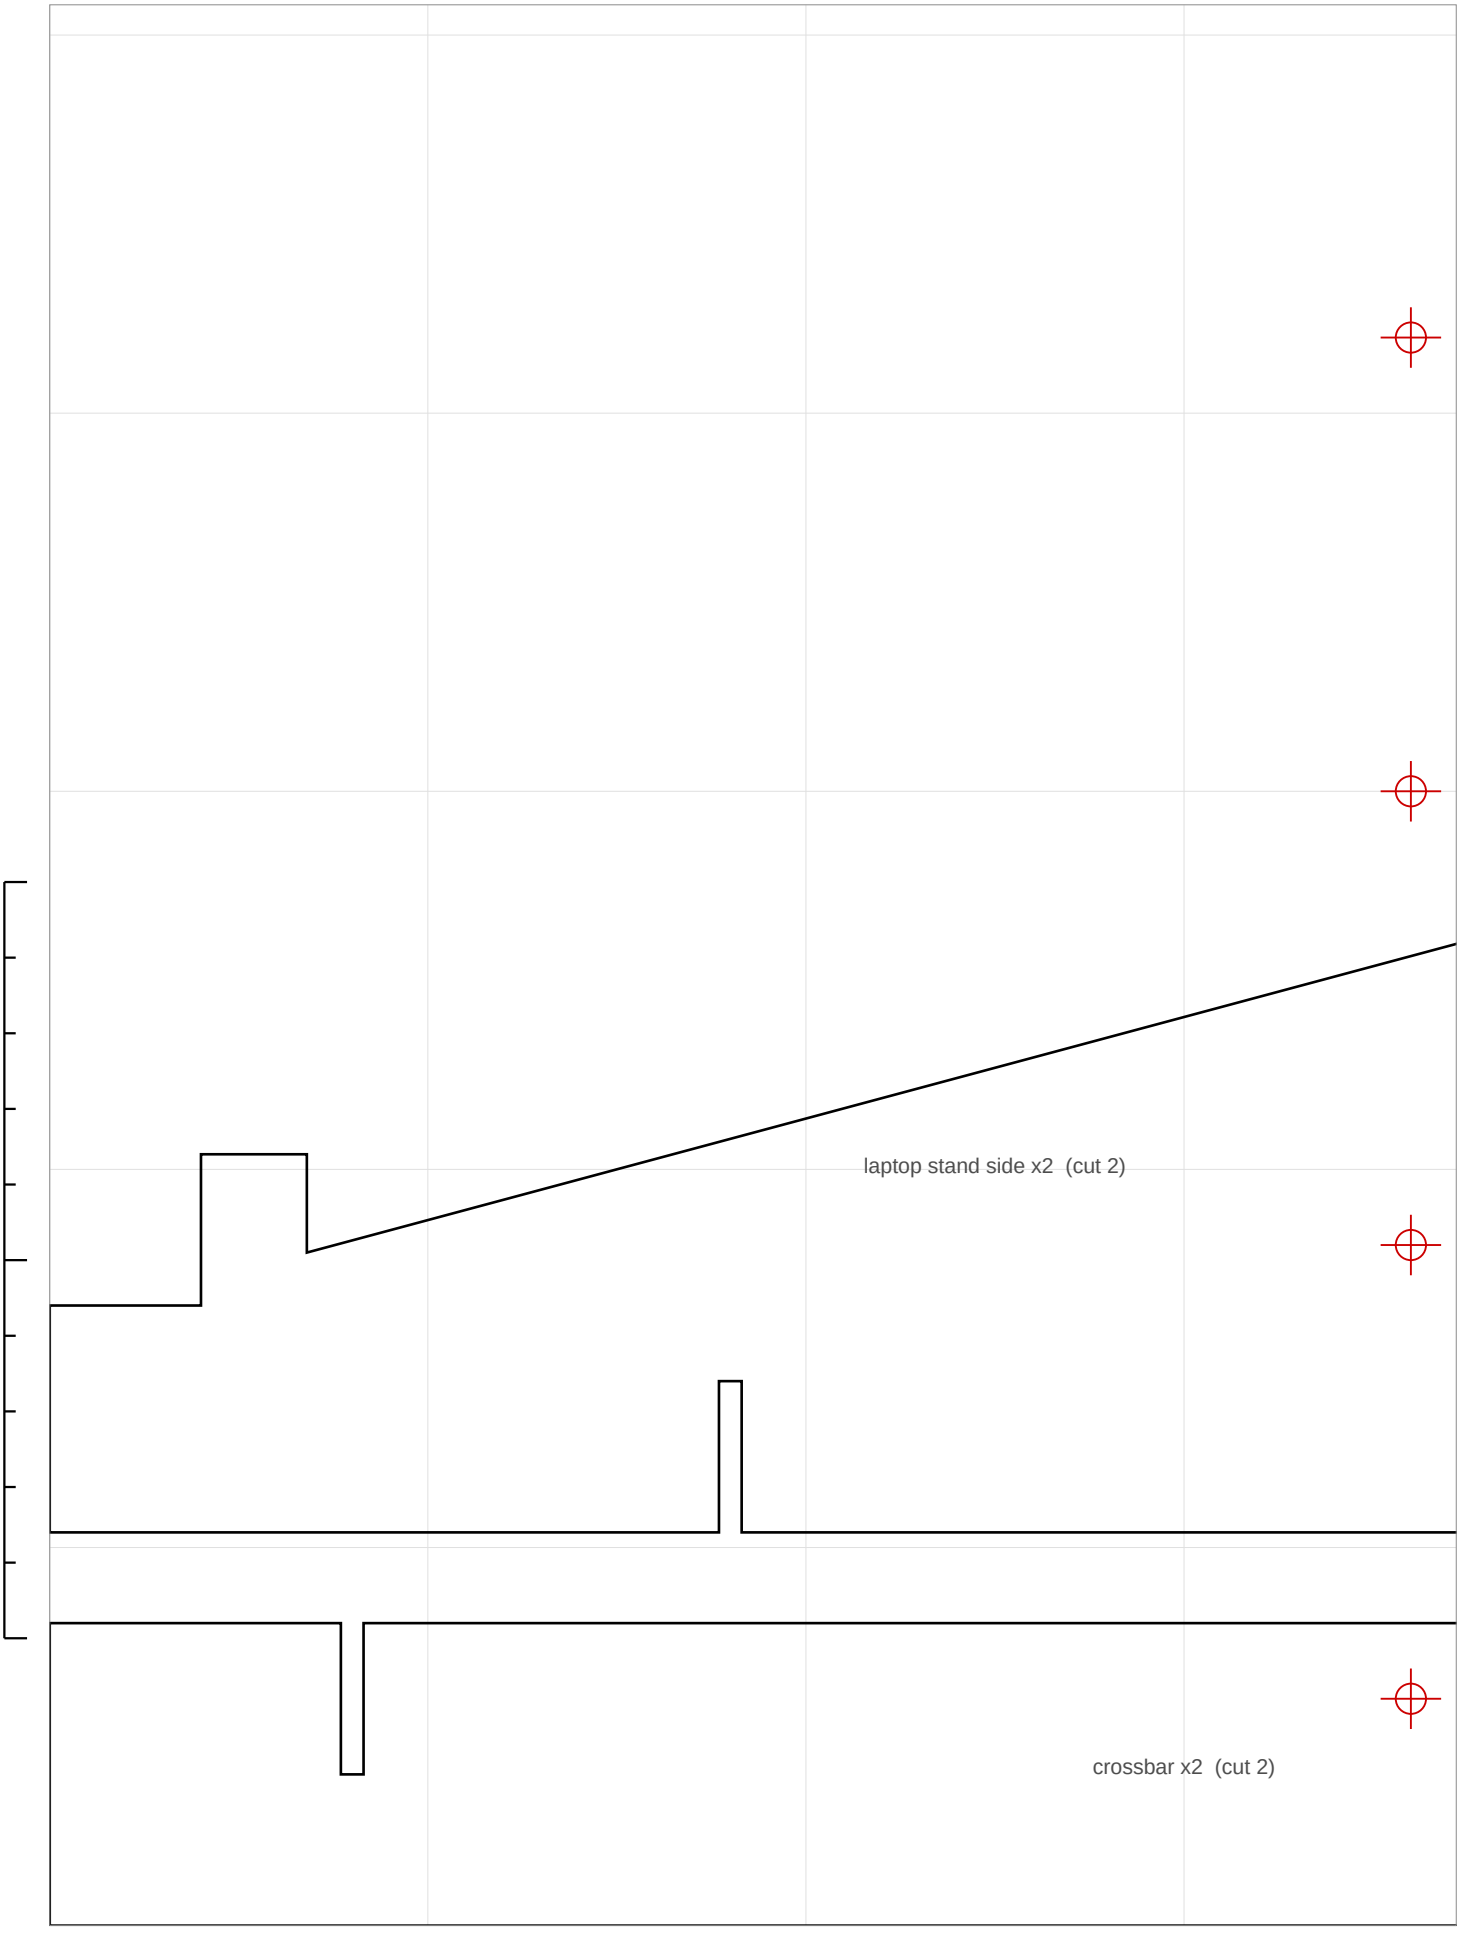
The lip at the front stops the laptop sliding off. Panels end up 220 mm apart.

100 mm: measure it! (print at 100 %)

04 Laptop stand - sheet A1 (2 x 1)

Print at 100 %. Trim the LEFT and BOTTOM edge along the gray frame, then overlap the neighbour and match the red crosses.

Solid = CUT dashed blue = SCORE + FOLD gray = GLUE + = punch hole Board 3 mm (slots 3 mm)

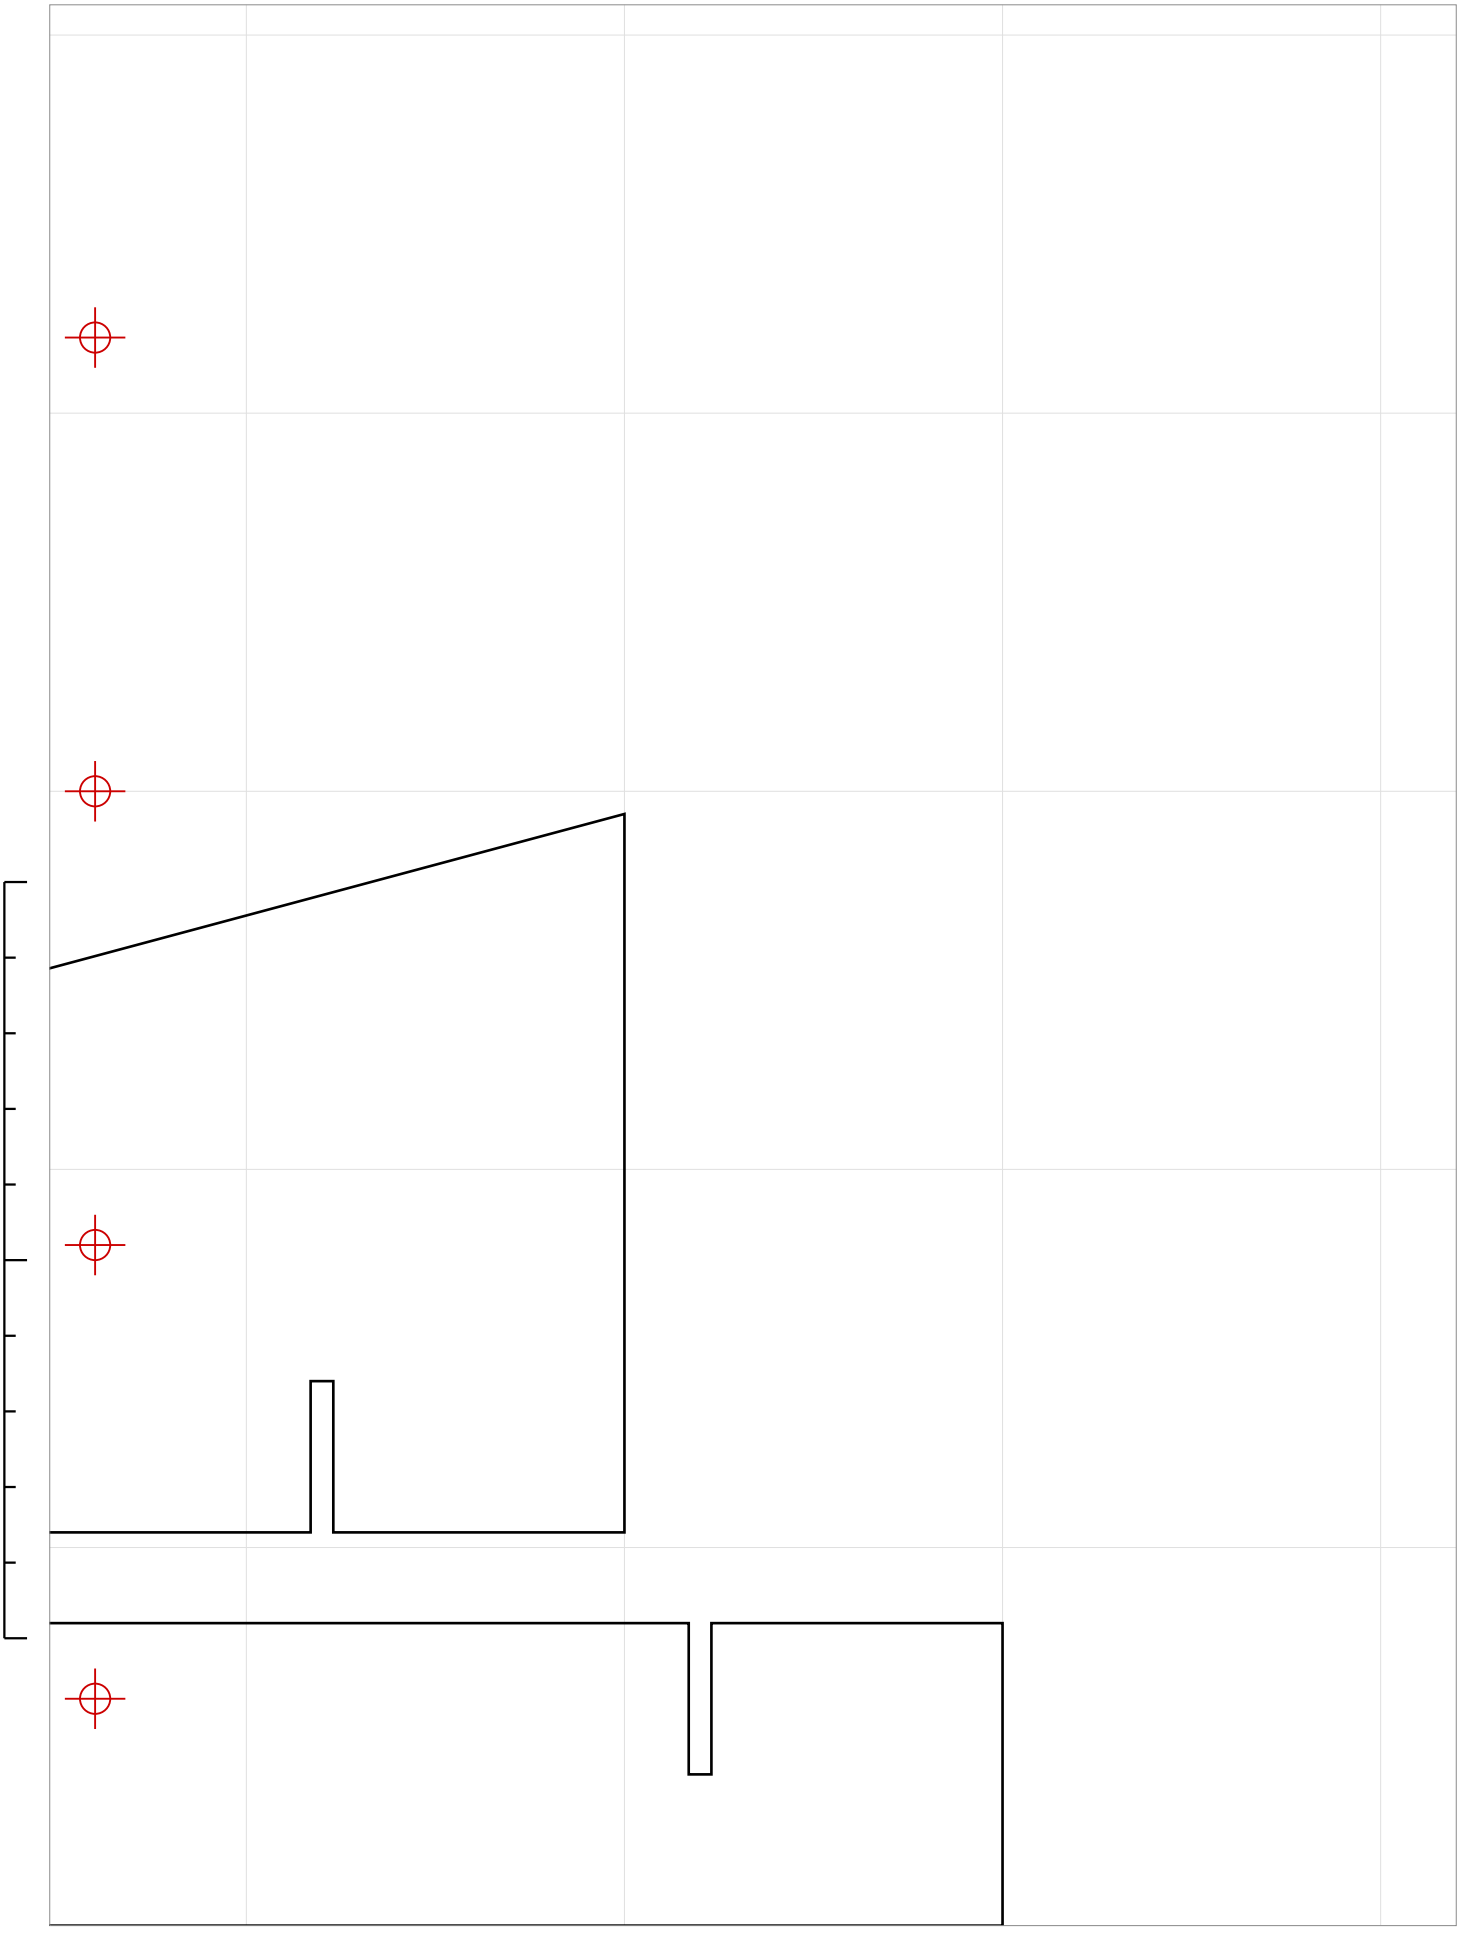


100 mm: measure it! (print at 100 %)

04 Laptop stand - sheet B1 (2 x 1)

Print at 100 %. Trim the LEFT and BOTTOM edge along the gray frame, then overlap the neighbour and match the red crosses.

Solid = CUT dashed blue = SCORE + FOLD gray = GLUE + = punch hole Board 3 mm (slots 3 mm)



<- left edge overlaps sheet A1

100 mm: measure it! (print at 100 %)
