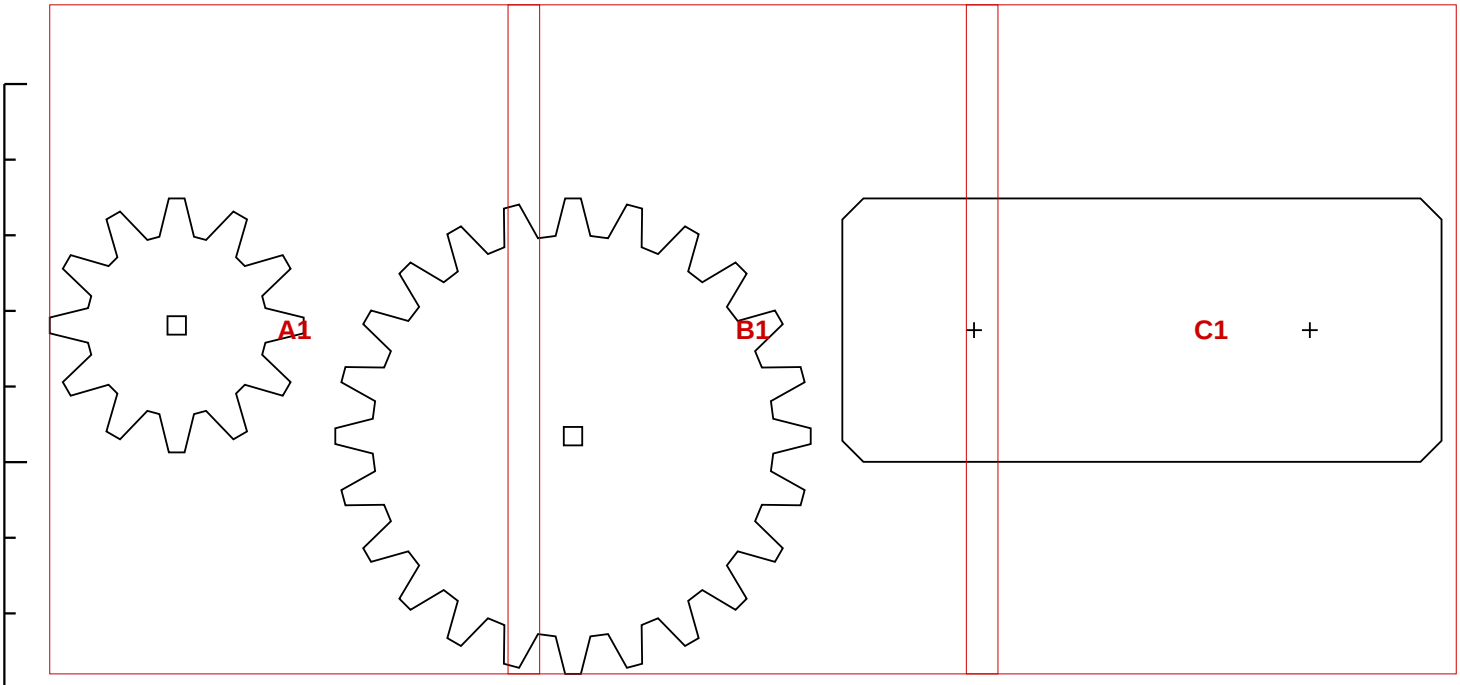
08 Gear pair 12T / 24T (2:1)

3 A4 sheets (3 across x 1 down) + this map. Print ALL pages at 100 % / actual size.

Solid = CUT dashed blue = SCORE + FOLD gray = GLUE + = punch hole Board 3 mm (slots 3 mm)



How to join the sheets:

1. Cut each sheet along its gray frame on the LEFT and BOTTOM side only (not on A-column / bottom row).
2. Lay it over its neighbour so the red crosses sit exactly on top of each other. Tape it.
3. Join a whole row first, then the rows. Then glue the template to the board and cut.

Parts: gear 12 teeth, gear 24 teeth, base, centers 127.5 mm apart

Cut both gears: each tooth is 4 straight cuts. Cut the 7 mm square center holes.

Push a pencil through each gear into the base marks (or use split pins).

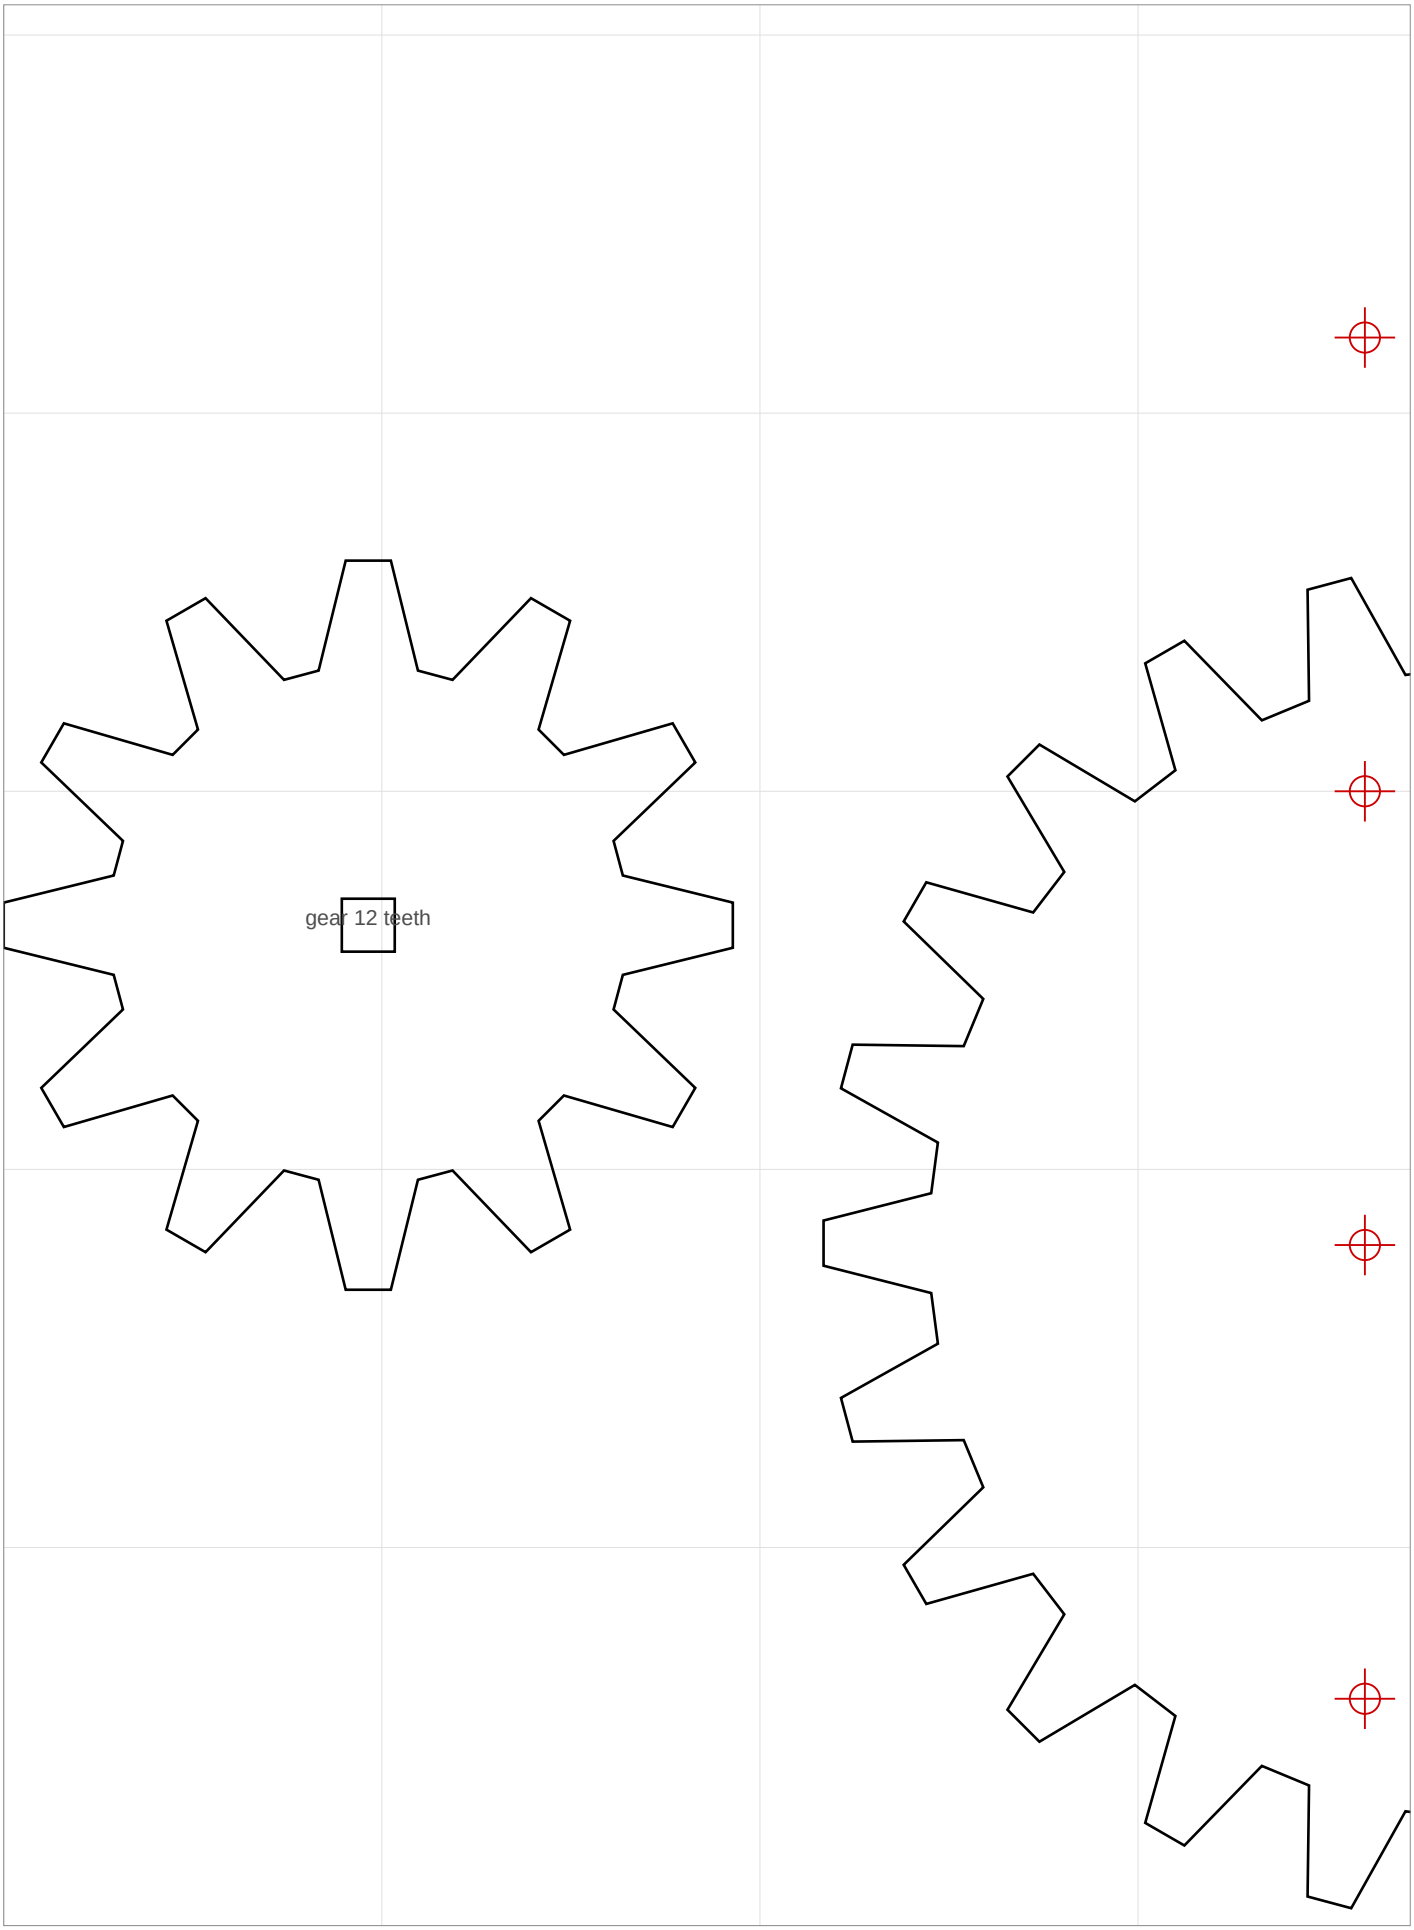
Turn the small gear twice: the big gear turns once, the other way.

100 mm: measure it! (print at 100 %)

08 Gear pair 12T / 24T (2:1) - sheet A1 (3 x 1)

Print at 100 %. Trim the LEFT and BOTTOM edge along the gray frame, then overlap the neighbour and match the red crosses.

Solid = CUT dashed blue = SCORE + FOLD gray = GLUE + = punch hole Board 3 mm (slots 3 mm)

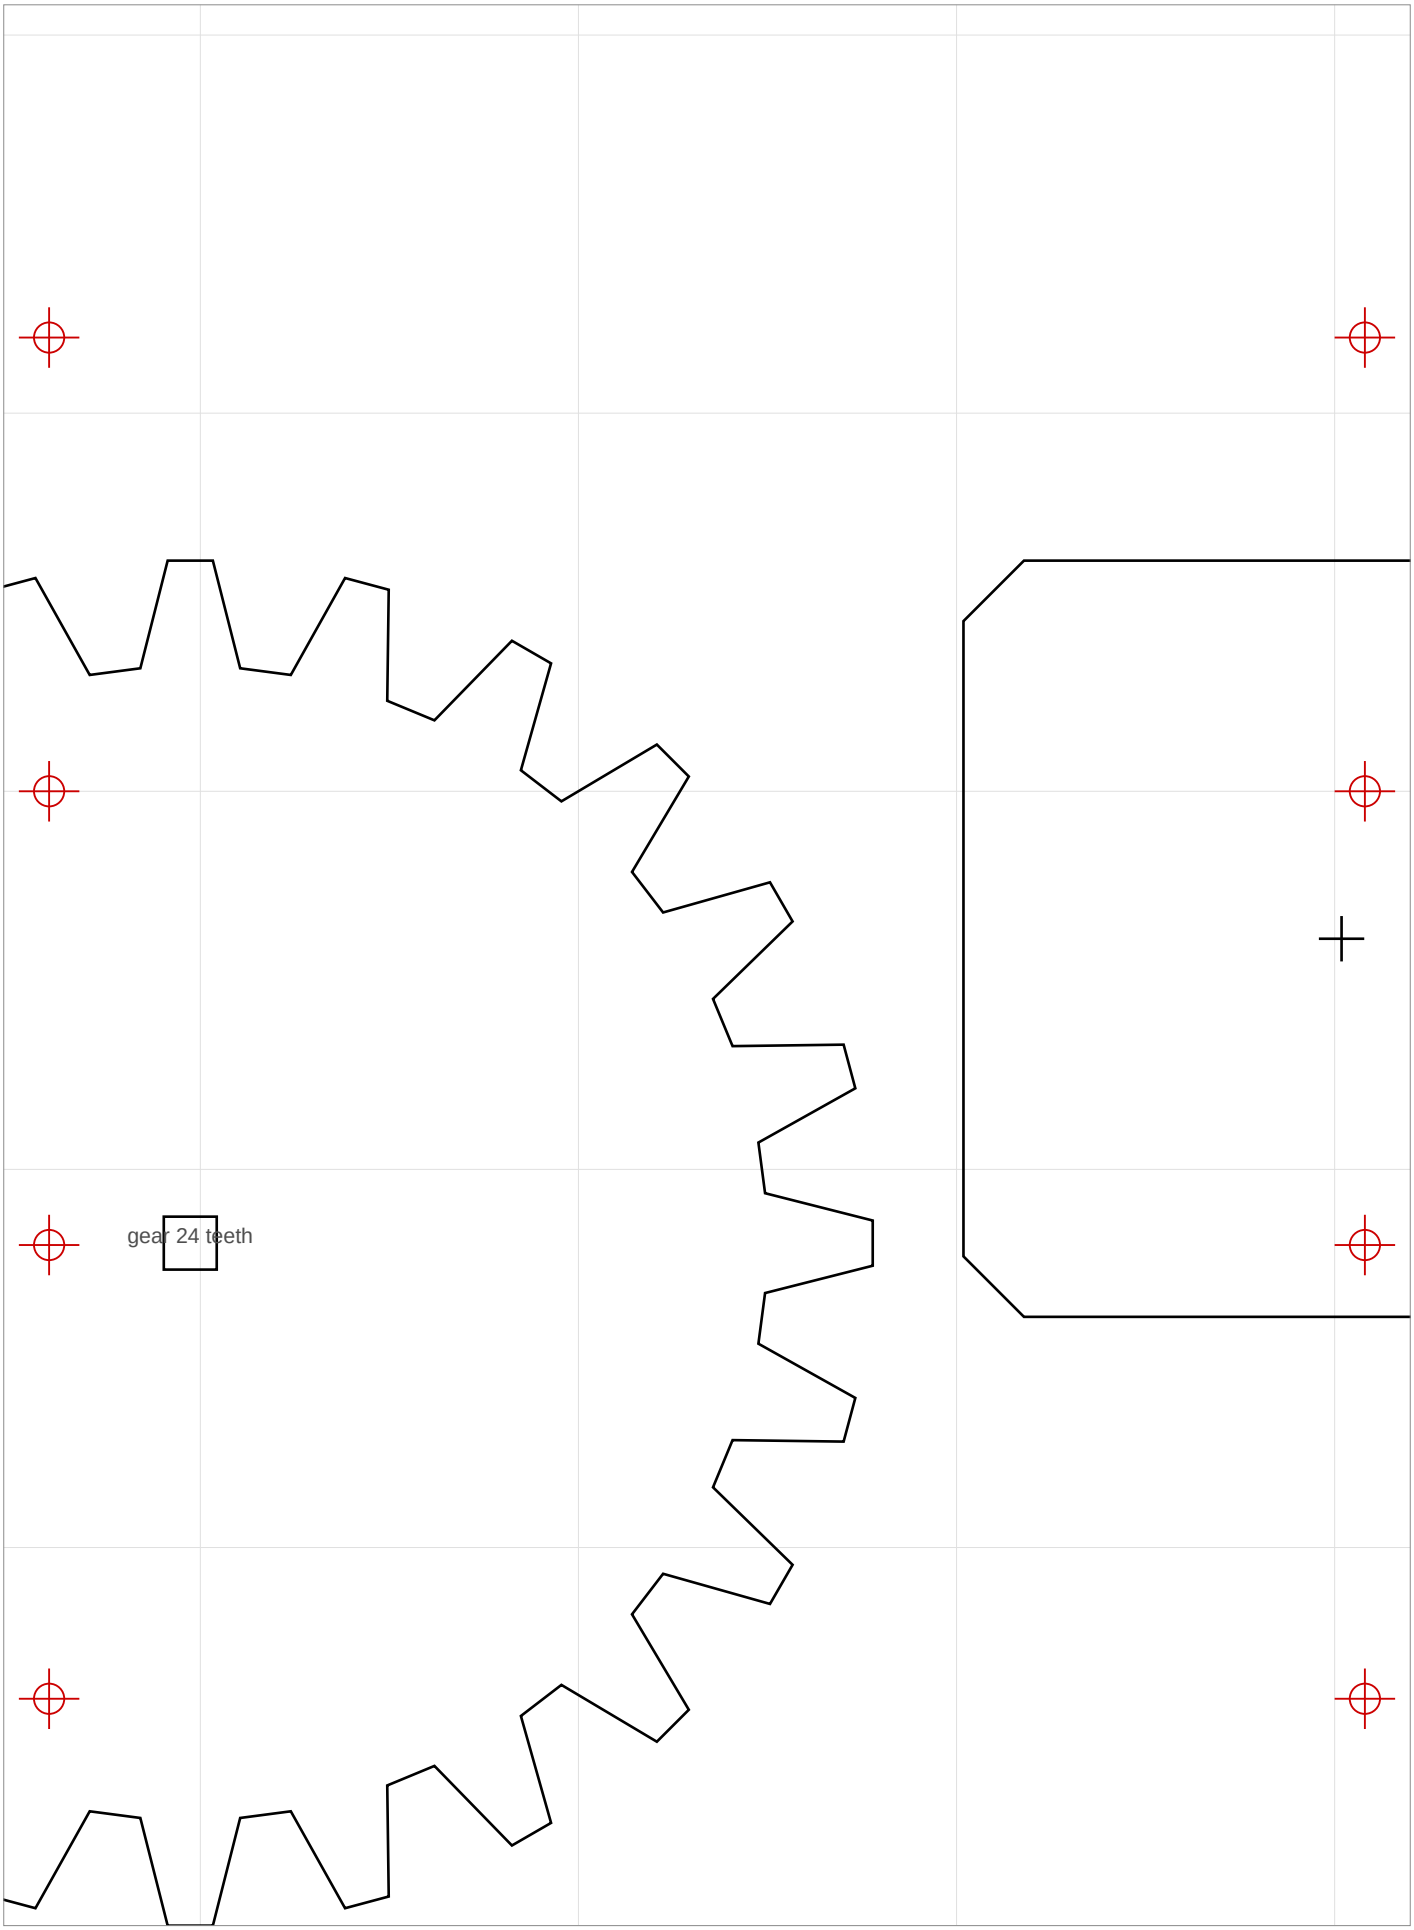


100 mm: measure it! (print at 100 %)

08 Gear pair 12T / 24T (2:1) - sheet B1 (3 x 1)

Print at 100 %. Trim the LEFT and BOTTOM edge along the gray frame, then overlap the neighbour and match the red crosses.

Solid = CUT dashed blue = SCORE + FOLD gray = GLUE + = punch hole Board 3 mm (slots 3 mm)



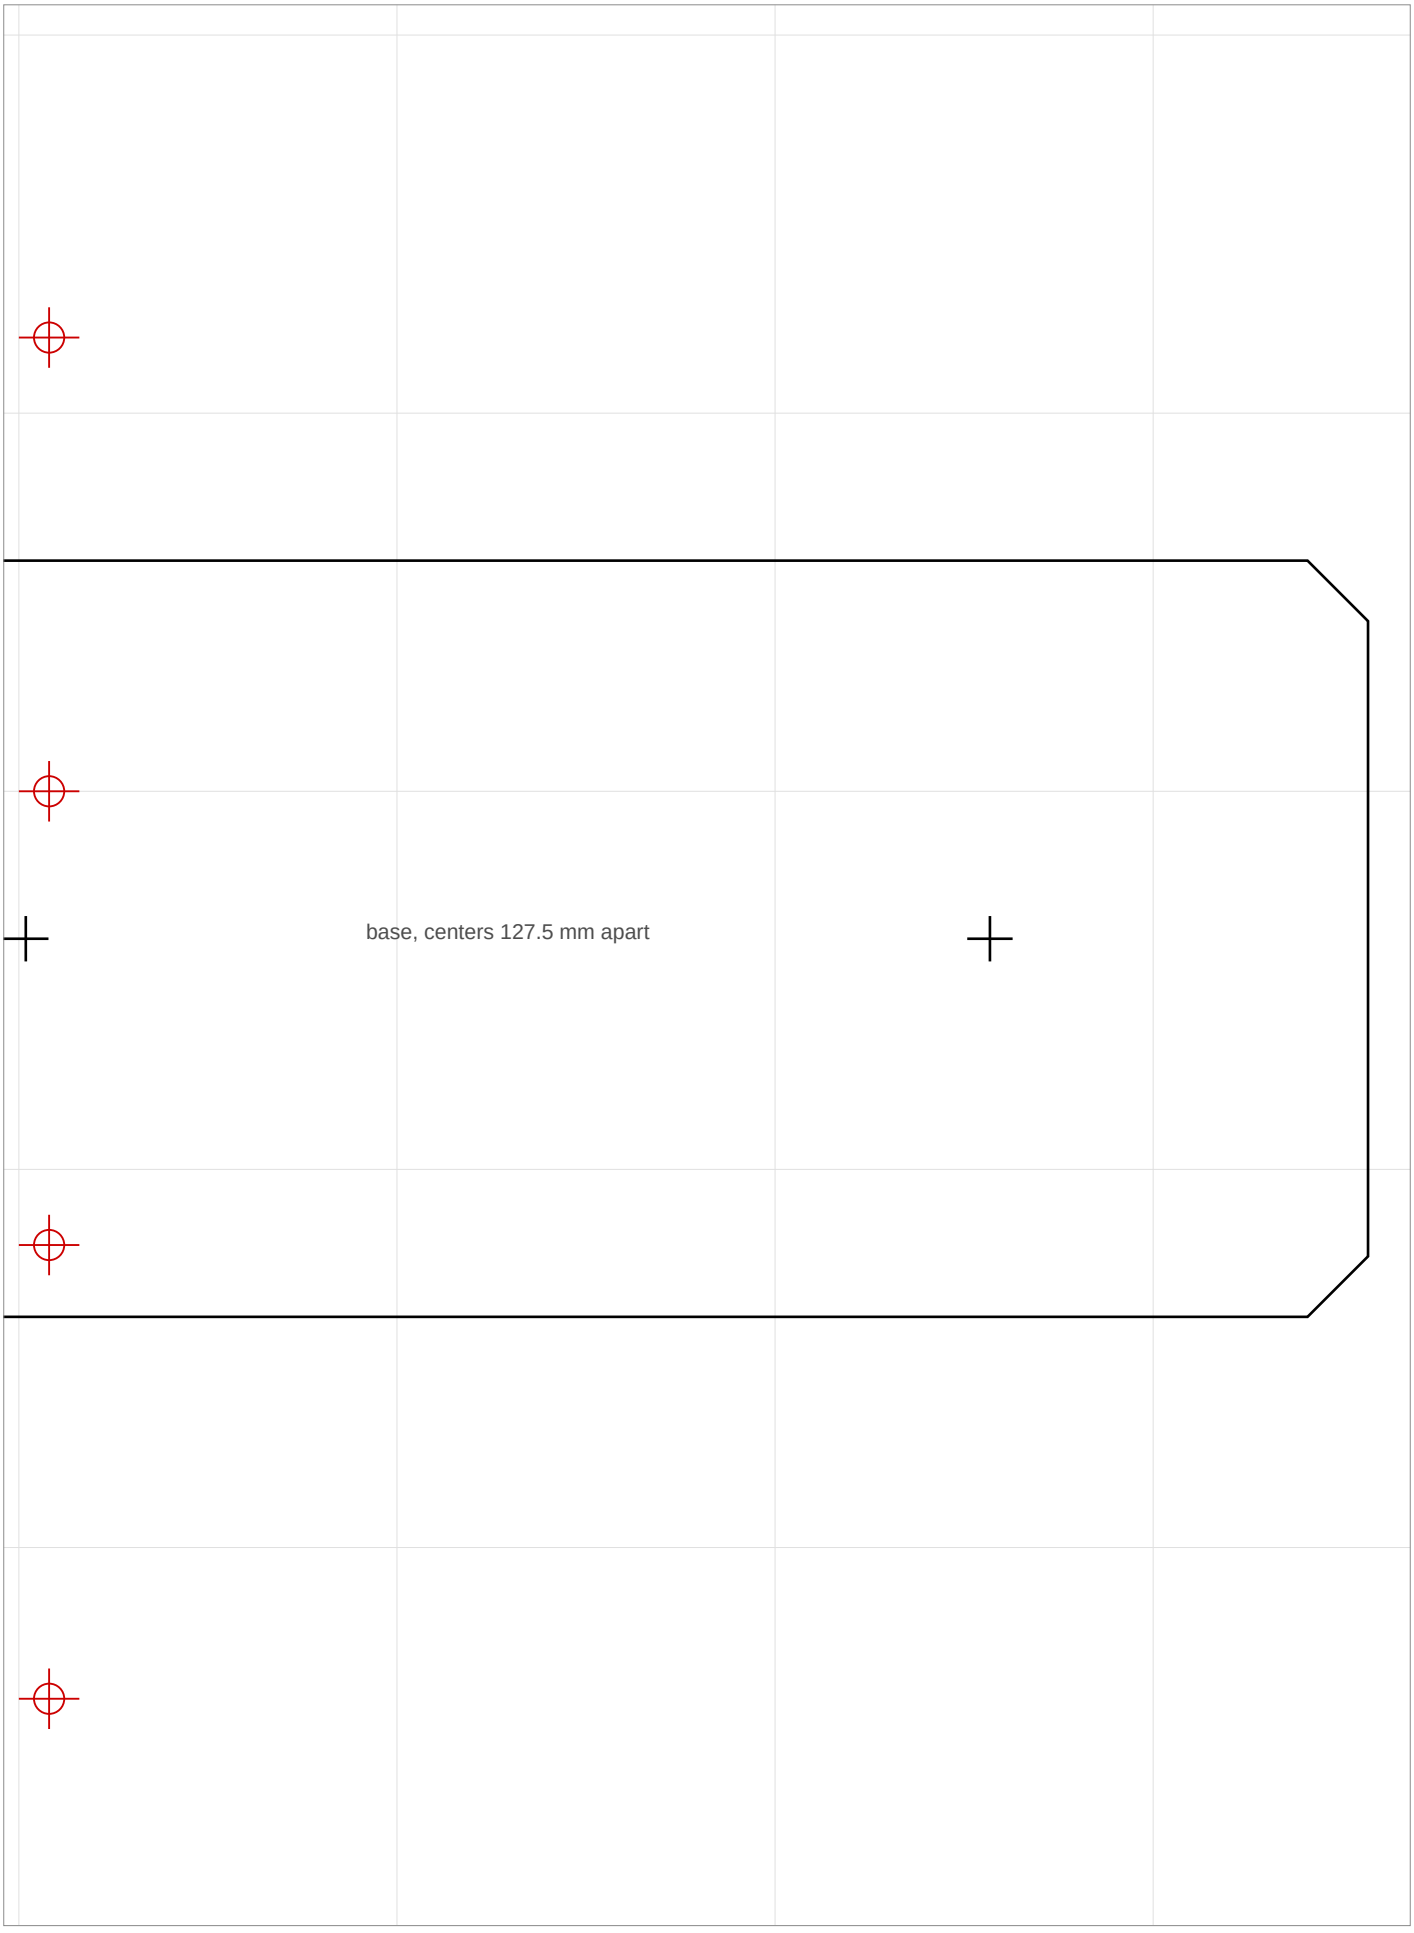
<- left edge overlaps sheet A1

100 mm: measure it! (print at 100 %)

08 Gear pair 12T / 24T (2:1) - sheet C1 (3 x 1)

Print at 100 %. Trim the LEFT and BOTTOM edge along the gray frame, then overlap the neighbour and match the red crosses.

Solid = CUT dashed blue = SCORE + FOLD gray = GLUE + = punch hole Board 3 mm (slots 3 mm)



<- left edge overlaps sheet B1

100 mm: measure it! (print at 100 %)
